THURSDAY, AUGUST 20, 1861.

Ir 18 Coming .- An officer at Camp Boone has written to his sister in Louisville, telling her to lenve the city, as there will be trouble here in a few days. The sister accordingly leaves immediately.

We knew that others, citizens of Louisville, have written home that they are all coming here shortly.

What arrangements have we for the reception of our expected guests? The new phase of the secession movement is a loud call for peace, and it comes a gentleman valling upon us at his request to from the most persistent and ultra cuemies of the Union. a direct choice between these two positions. Nothing can be more lorcible than the Bible truth that those who are not for the countr must be against it. A loval American citizen can have no sympathies with the revolutionary and oligarchical government at Richmond every manly instinct must repel association with it, as inaugurated through the most dis reputable agencies. The Southern Confedgracy is not our Confederacy; we have a country, a llag, and a Union of our own, and we will live, by God's blessing, in the lature, as we have lived in the past, proud of the honored privilego of calling nurselves American citizens. Those who ask for peace, mean disgraceful submission to treason, and it is sad to think that so many are now advecating it There can he no compromise upon the question of secession, for if it is admitted our Govern ment is as "unstable as water," and those who propose it are public enemies. The emphatic illustration of the Hon. Joseph Holt, that it is kept on bourd boring holes in the bottom of the ship, has wonderful significance. The Courier labors assiduously with its secession auger, and the peace gatherings at Concert vessel of State. It cannot outlive such action but must founder. As our course of duty is clear, our purposes should be well defined. The Union must be preserved at any sacritice and open enemies are not so much to be dreaded as its factious friends or pretended friends.

THE COURIER ON "RUMORS "-The Courier yesterday annonnees the following rumors MOVEMENT OF ROPSSEAMS BRIGADE.—We have it runored that the brigade of Gen. But Roger Hanson is fairly in the secession camp, and the secessionists may well be startled, for we doubt whether so big a bomb ever fell in their camp before except in the single instance of Humphrey Murshall. When a bomb falls where it might do muschief, the safest course is to kick it out as quick as possible, but the secession people can do no they sible, but the secession people can do no they sible. Roger was professing to be n good for the larrodsburg Press, writing from the Cump at Manassas Junction on the 10th of August, snid:

The act passed unacimously.

When asked why he was so confident on the war in the United States, as the Frankfort Commonwealth says, has been assessed at \$500,000 only—two handred thousand less than a million. What would Kentucky's proportion be of the ONE HUNDRED MIL. proportion be of the ONE HUNDRED MIL-LION tax? NOT A CENT LESS THAN TWELVE MILLIONS OF DOLLARS.

Now the tax-pavers of Kentucky will please notice that the very men who pretend to be in lavor of saving you from paying taxes are the ery men who are in favor of taking you into the Southern Coutsderacy, where your taxes GREATER THAN THEY ARE IN THIS UNION.

Again, in the Union slaves and merchandise are not taxed at all, while in the Southern Confederacy every species of property is subect to the most enormous laxation; and, what axation in the bogus Confederacy.

Tax payers of Kentucky! pause and reflect ipon this thing. Satisfy yourselves. Do not e deluded by the agents and hirelings of the ebellious States. They seek to make stepping tones of your property to carry out their villainous plans of sell aggrandizement. Again

CHARGE OF FORGERY, - Louis Tachau was arraigned before the Police Court yesterday on a charge of forgery, under the following circumstances: It appears that there has been an understanding between the agants of Collector Cotten at the Nashville Depot and Capt, Silas Miller, of the Galt House, wherehy Captain Millar gave passes to travelers going South which were recgnized by the Collector's agents, who parmitted the haggage of the holder to pass without examination. Possessing a knowledge of this fact, it was charged against Mr. Tachau that he had forged Mr. Miller's passas, by which means con traband goode had been shipped on the Louisvill and Nashville road. Mr. Techau waivad an examination, and escaped prosecution by giving bail in a nominal sum for his good behavior.

CONTRABANDS SEIZED,-It has been known to the authorities for some time that there is a depot for contraband goods in the vicinity of the old Oakland Race Course. Goods have been taken there in small lots from time to time and sent fornight, and took measures to circumvent the designs of the smugglers. Sure enough two wagone wera fully loaded and started on their way South, They contained hops, pasteboards, and machinery. which was stored in the Custom Housa.

I learn it has been, and is, a matter of bitter complaint and earnest remonstrance by the commanding Generals. And not only is there a want of sufficient quentity, but the provisions are not good, are, in fact, positively unwholesome. It is not only so at the camps in Fairfax county, where the army is large, but also in other camps. A great deal of sickness is the natural consenance. One regiment near Acquai Creek, has sixty men, and another thirty. The weather ias been intensely hot, and the great mortality is attributed by the troops to bad provisions, un-suitable at any time, especially during such a

> rm consumption. The term "consumption" was originally applied many diseases situated in different to many diseases situated in different organs, and having no symptoms in common except the wasting or emaciation of the body. They were called consumptions because the body consumed away. This use of the term led to great confusion among writers, and it was soon found necessary to designate the kind of consumption meant, by praffixing the name of the afforted pressure. prafixing the name of the affected orga Laennac, the great discoverar of the stethascope, in the course of his extensive researches into the pathology of the lungs, found that granular budies always exist in the lungs in ganuine consumption. These bodies are called Inbercles; and, since the time of Lannec, the term consumption has been restricted and understood to see the tion has been restricted and understood to apply to a disease of the long characterized by their presence. When, therefore, I speak of consump-tion, I mean not only a disease of the lungs, but inbercular disease. I am particular that this should be undarstood, for the changes which these tubercles undargo produce the destruction of the lungs, and all that malanchely train of symptoms which mark the progress of consump-tion; while their seat—the sir-tubes and cells of the longs—indicates the treatment necessary for

The tubarcles regulate the stage of the disease y the changes which they undergo. We say consumption is in the first stage when the inpercles are small specks or points of a gravish color—balf transperent. In this condition they esemble millet seed, and hance are called utiliary tubercles. This tubercular matter is secreted from the blood. It is not only poured out into the air calls, and on the free surface of the mucous lining of the air tubes, but deposited in the cous lining of the air tubes, but deposited in the delicate structures which go to make up the lungs. Whatever interferes with decarbonization of the blood will preduce tubercles. They are always the produce of a defective performance of the function of the lungs. Catarrh produces them hy inducing and faeding irritation in the larynx and windpipe is always followed by bronchitis. Bronchitis is always followed by bronchitis. Bronchitis is always attended by the secretion of a viscid mucous or phlegm, which blocks up the air-tubes, and prevents the admission of air. and prevents the admission of air. The moment the air is shut off from a cluster of air-cells those cells become the centre of imperfect decarcontraction, and sooner or later will become it becolous. Here, then, you see a chein of irr ation beginning in a simple oftearth, and endurn n consumption. It is not the irritation that proin consumption. His not the irritation that produces the tubercles—for irritation in any other organ than the lungs would not be followed by their development—but it is the obstruction which the viscid mucous cases is the air tubes. The hawking up of this eticky kind of mocous may be the only synutem of consumption in the birst stage. From this you will understand what a fatal mistake those make who wait for more serious symptoms to arise.

ons symptoms to arise.

In the second stage of consumption the tubers become much increased in size. In the lirs sy were of the size of millet seed; they hav hey were of the size of indlet seed; they have now become of sizes varying from a small pea to a tilbert. They have also undergone a change in color—from poarl grey to yellow. When taken from the lungs of persons who have died, and pressed between the lingers, they break down just like lumps of old cheese. These cheesy tuber-cles, from their size, increase the obstruction to the lungs, cauting shortness of breath, and generally a considerable addition to the cough and expectation.

less chaesy tubercles becoming softened down to pus, and by their producing alceration of the distance of the lungs. When the process of ulcoration commences we have all the worst symp-oms mangurated—beetic fever, night sweats, severe cough, expectorations of yellow matter, spiriting of blood, loss of llosh, and strength, and bleuritic pains. These, by slow degrees, wear out the power of life, and the patient sinks.

Here, then, you have an outline of that disease which we apply the term consumption.

My next letter will be on chronic consumption.

Many of the victims of this outlawry were formerly residents of Southern Illinois, and well known as percons if the highest respectability, and their characters are such that the truth of their statements cannot be questioned. Di Thirsday last, some old residents of Williamson were driven from their homes in Missouri, their property seized, and all their means "conflected." They crossed the river, and, proceeding to their former places of residence, applied to their old friends for aid. Fifteen men promptly responded to the call, and on Suoday they started for Missouri, determined to see justice done. o see justice done.
On the 10th inst., Mr. John H. Land Warrants in New Yorks.—The Question of their Assignment.— The business in land warrants has recently been much contracted, and warrant holders very much disturbed by a decision of the Secretary of the Inlerior, that warrante assigned in blank were void. As ninetynine warrants in each hundred during the last ten years have been so assigned, the Department having always recognized such assignment, this eccision, which converted Thousands of warrants into worthies paper, caused much alum. We are glad to see by the following letter, received by Messre. Taylor Brithers, that the Secretary has reviewed his decision, and that land warrants are again of some value: ere again of some value:

BANKING HOUSE OF SWEENEY, RITTLY) Washington, Aug. 20, 1861. Messrs. Tayler brothers, bankers, New York

City:
GENTLEMIN. Our Mr. Faut had a very satisfactory interview with the Secretary of the Interior this morning, in relation to the question of blank assignments, to which you have called our attention. He authori ed him to say that, masmuch as Congress had not, in his opinion, made land warrants negotiable, his decision was only intended to protect bena fide owners of blank assigned warrants which may have been stolen, or signed warrants which may have been stolen, or else improperly obtained; that he did not mean to interfere with the buying and celling of blank assigned warrants; and that he saw no reason why the huciness could not go on as hefore, that the boator, at the time of making the entry, could insert his name, and of course the same and of course. the Government as to the validity thereof. If, however, a contest was made in cases of warrants improperly obtained, such assignment would be

correspondent of the New York Tribune furnishes Hall the following interesting information relative to the siege of Sebastopol:

For a whole year the heaviest ordnance which the mightiest powers of Europe could command, directed by the most perfect science mankind ever saw, shock with its thunderings the Heracleidan Saw, snook with its thunderings the Heracleuten Chersonese. France, the most martial of modern nations, contributed in the gigantic strife 1,676 guns, rearly all of which were of the largest culture. They exploded 9,000,000 pounds of powder in front of the beleaguered city, throwing into it and its covering works 1,250,000 rounds of shot and shell. England, long her rival enemy, but now her ally, threw at the same time of like marrial 252,000 rounds. The vives act marrially was thickly strewed within the radius of the works of attack. One of the ravines leading to tha town, on the left of the English attack, was known as 'The Valley of Doath,' in the bottom of it, in some places, our horses literally walked on a patrement of cannon balls lying close together."

A heroic axploit is told of a leantiful young woman in the village of Spinelli. The house of hor uncle, a Liberal priest, was invaded by some 20 brigand ruffians. One of the leaders was annising himself by stabbing the poor priest, who was old, when the girl rushed in, llung hersolf on him, enatched in an instant tha brace of revolvers he had in hie belt, and shot him dead. She ran through all the rocuns, firing upon every brigand she found engaged in plundering the house. She shot down four of them, Alarmed at this mexpected attack, and not knowing what to make of it, the ruffians in the other rocuns ran out. She, still pursuing them, succeeded, before they could get a knowledge of the enemy they had to ancounter, in closing the front door against them. The brigands allempted to set hire to the house. From the bahrony sho put cut an old musket belauging to her uncle, and fired upon them again, and then displaying from the window a tri-colored fite, cried "Viva Garibaldi" with all her strength. The miscrosnis lired an inoffoctual shot or two and fairly ran for it. A few moments shot or two and fairly ran for it. A few moments after a Captain of bersaglieri, who just cama up, found the exhausted girl in a faint upon the dead

Important if True.—As turpentine it contrahard now, and has advanced from 30 conts to \$1 20 per gallon, a substitute is wanted for mixing paint, it is now stated by painters who have fined it, that the nuptha, or leavedle, as it is generally called, taken from the petrolaum oil, is equally as good, and on some accounts hotter, than the lurpentine, and we observe by the Pennsylvania and Ohio papers, is in general use by all peinters.—Rochester Advertiser.

Neptha has for some months past been used by many of our painters as a substitute for lurpanine. Biessers, Hervey & Bousneld, of the Boston Pail Company, ise it for all their wars, and its use is every day becoming mura extended. The price of naptha at our c all oil refinerine, where it is manufactured, is wa understand 35 cents per gallon. Herca all painters can see the henceit to be derived from using it.—Cleveland Herald.
